

# Recommended Reading For Judges, Judge Candidates & Exhibitors

## **HORSE ANATOMY ~ A Pictorial Approach To Equine Structure by: PETER GOODY**

This second edition has been completely revised and enlarged. It's original 25 pages of illustrations have more than doubled and now include over 250 individual drawings. All of these drawings have been specially prepared for this new edition by John Goody and all are fully labeled and annotated in the accompanying legends. The text is primarily intended to explain and in many instances to expand upon the content of the drawings.

The basic make-up of the horse is considered with the "points" of the horse being shown from several different views. Bones, muscles, tendons and ligaments providing the anatomical basis for these surface points are dealt with in some detail, the emphasis being placed throughout on those structures that can be seen or felt from the surface of the body.

Component parts of the digestive, respiratory, urinary and reproductive systems are shown in a number of drawings, as are nerves and blood vessels. Special consideration is given to the structure of the head, with the emphasis on the nasal cavity, teeth and larynx. The structure of the limbs is also illustrated in some considerable detail, especially the foot.

**This book is now available through the AHSA and is a wealth of information being of great interest and value to owners, riders, breeders as well as vets and equine studies students. Anyone wanting to know more about the structure of the horse and what makes it one of the most beautiful of animals will appreciate this book. It is recommended reading for all new Arabian Judge Candidates & existing Panel Judges!**

### **DETAILS:**
